

To the Board of Adjustment

We are wanting to build a 2 story/ 2 bedroom/ 2 and half bath single family home at 3625 Lee Ave. We may use home to live in or rent long term. We want the house to fit into the fabric of the neighborhood but use more modern metal materials for the exterior for longevity and safety. With our design we are keeping a low profile for the front of house so appears more of single story home similar to houses in neighborhood. We both love Hillcrest and want to build something that will add value to the area for generations to come!

Sincerely,

Liraz Ben Zikri
